Today, the Commissionissuesorders pursuant to Section 6(b) of the Commission Act

¹ to find the answers to those questions, at least in Matt.have ordered companies to turn over documents and information consumers private dataereused to engage in personalized pricing, which the orders describe as "surveillance." Prīcīnis practice involves the use of personal data to charge different consumers different prices for the same product. This practice is ancient and commonplace for many products and services. The price insurance policies or of credit, for example, necessarily turn on a consumer's persainal de because the price must reflect
